

223 W. Erie St., Ste 4E

Chicago, IL 60654

---

At MyOwnDoctor, we have created a unique, comprehensive software platform. Our complete solution addresses whole-person care all in one place. An integrated ecosystem composed of an embedded user base, providers, nonprofits, and faith-based organizations, seamlessly connects students with access to wrap-around programs and services.

As a Chicago-based company, we uniquely possess a thorough understanding of local resources and programs that benefit your student population. We offer culturally competent virtual care that connects your students to providers who look like them and understand their lived experiences. MyOwnDoctor is a Business Enterprise Program (BEP) certified provider with two of our co-founders being Black, the third being Female, and our CEO being a Black Female. This diverse leadership structure permeates throughout our entire organization, enabling us to better understand the needs and address populations such as the student body at City Colleges of Chicago (CCC).

Our providers licensed in Illinois are diverse by culture and credentials (e.g., psychiatrists, nurse practitioners, psychologists, social workers, clinical therapists, counselors, and psychometrists). Our competent and caring providers are available to offer a broad range of services. Virtual Mental/Behavioral Health Screenings, Virtual Crisis Services, Virtual Therapy Consults, Virtual Psychiatric Consults, Virtual and on-site Psychological Testing Services, Support Groups, and live and recorded seminars are also unique to MyOwnDoctor. We also work directly with your Mental Health staff and fully integrate with your existing program. We serve as a true partner by providing feedback, assisting with the development, and promoting a continuous improvement strategy to elevate the services offered to CCC students.

We can brand our services and integrate them directly into the CCC website from a software perspective. Our Branded Virtual Practice enables us to reduce implementation timelines. We utilize the power of a custom landing page to provide messages consistent with your approach to behavioral health to the CCC student population. The application will give your students access to Comprehensive Mental Health Services from a trusted source.
