

BOARD OF TRUSTEES OF COMMUNITY COLLEGE DISTRICT NO. 508
County of Cook and State of Illinois

MALCOLM X COLLEGE

The Malcolm X College Radiology Technology Students
Win Annual Radiologic Technologists Scholar Bowl

THE CHANCELLOR

REPORTS that on April 21, 2006, students from the Malcolm X College Radiologic Technology Program distinguished themselves, earning First Place, in the annual Illinois State Society of Radiologic Technologists Scholar Bowl. The Scholar Bowl is a state wide competition testing students' knowledge of theory and practice in Radiography. The competition is held during the ISSRT annual meeting in Peoria, IL. Historically, the student teams representing Malcolm X College have been regarded throughout the state as the most formidable competitors in these scholarly contests. ISSRT is the professional organization that represents the radiologic sciences in the state of Illinois; and

that Malcolm X College students of the class of 2006, David Gonzalez, Carlos Cheon, Martha Lapczynski and Juanita Corhn prepared for this competition under the tutelage of Geraldine Williams, (Program Director), Michael White, (faculty), and Paulette Labon, (Lab Coordinator). The MXC students consistently excelled in answering theory and application questions posed by a distinguished panel of experts. This victory, while surpassing the second place finish in 2005, represents another hallmark attesting to the consistent quality of academic preparation Malcolm X College students enjoy in the Radiologic Technology program; and

that participation in the Scholar Bowl is another example of the ongoing series of activities and departmental specific health educational events engaged in throughout the year by the 14 health science disciplines available for study and certification at Malcolm X College

Respectfully submitted,

Wayne D. Watson
