

**BOARD OF TRUSTEES OF COMMUNITY COLLEGE DISTRICT NO. 508
County of Cook and State of Illinois**

MALCOLM X COLLEGE

**NEPHROLOGY/RENAL TECHNOLOGY PROGRAM PARTNERSHIP
WITH NATIONAL KIDNEY FOUNDATION OF ILLINOIS**

THE CHANCELLOR

REPORTS

that in February 2007, Malcolm X College Nephrology/Renal Program entered into a partnership with the National Kidney Foundation of Illinois. Under the leadership of Patricia Williams, Program Director and the coordination of Dr. Ahmed Khan, Instructor, community screening has been incorporated into the curriculum. This screening detects potentially susceptible individuals for factors causing kidney diseases and also detects kidney diseases at an early stage; and

with this partnership the students will have structured training to assess and evaluate individuals coming for a check up and learn to perform basic screening laboratory tests. The students under the supervision of college instructors will participate in this community screening once a month. Through this initiative and the programs partnership, students will practice the core value of Malcolm X College by supporting our community and by promoting and cooperating in activities that enhance the quality of life.

THE CHANCELLOR

RECOMMENDS

the approval of the partnership between Malcolm X College Nephrology/Renal Program and the National Kidney Foundation of Illinois.

Respectfully submitted,

Wayne D. Watson
Chancellor

June 20, 2007
