

BOARD OF TRUSTEES OF COMMUNITY COLLEGE DISTRICT NO. 508
County of Cook and State of Illinois

WEBINAR HELD ON STUDENT EARLY WARNING SYSTEMS
TRUMAN COLLEGE

THE CHANCELLOR

REPORTS that the Faculty/Student Services Retention Committee held a "webinar" on *Early Warning Systems: An Intentional Approach to Ensuring Student Success* April 10; and

that this was one of the tools the committee is using to establish guidelines and best practices for Truman's Early Alert System; and

that the webinar provided information on why an early alert process is important, key components to include in such processes, how to identify students at risk, how often and early to intervene, and who should be involved; and

that the program also included examples of how colleges and universities are intervening with students and how they are using data, technology, and other resources to manage their processes, including how they use academic advisors in early alert.

Respectfully submitted,

Wayne D. Watson
Chancellor
