**REPORTS**

that the Lambda Iota Chapter of Phi Theta Kappa at Olive-Harvey College went into the Roseland Community to spread information about fire prevention. As the winter season approaches there are a number of fire hazards that develop in Chicago Area households. However, thanks to the members of Phi Theta Kappa at OHC there is a greater understanding of how to avoid potential situations that could cause fires. The students met with over 100 households throughout the Southside of Chicago to spread tips on fire safety.
