County of Cook and State of Illinois**

**Alternative Fuel Vehicle Workshop  
KENNEDY-KING COLLEGE**

**THE CHANCELLOR**

**REPORTS**

that Kennedy-King College's Automotive Technology program and KKC's Auto Tech Club held an Alternative Fuel Vehicle Workshop on April 18, 2009. The event was well attended by automotive students, automotive instructors, automotive technicians and interested citizens. The workshop, conducted under the direction of automotive instructor Mr. Earl Powell, covered ethanol (E 85) vehicles and hybrid vehicles. Participants were able to inspect and ask questions regarding alternative fuel vehicles of representatives from Rogers Auto Group and Flex Fuel U.S. Inc. who provided alternative fuel vehicles for the event. Some of the students had a chance to ride an electric bicycle provided by Eco-Bike, Inc., which they found very exciting. The Auto-Tech students were so impressed with the information on alternative fuel vehicles that they are currently planning follow-up events to further explore alternative fuel vehicles.

Respectfully submitted,

Wayne D. Watson  
Chancellor
