The product provides:

- Extract, Transform, and Load (ETL) software for pulling data out of data sources, such as PeopleSoft Campus Solution module, and into the Zogotech data warehouse.
- A pre-built data warehouse that aggregates data in formats common in the community college space.
- Online analytical processing data cubes for quick retrieval of reports around common

metrics– fed from data from the data warehouse – such as student enrollment, retention and completion.

- A reporting/presentation layer for formatting data around CCC strategic metrics in a way that is most accessible and actionable for any given user. These include self-service platform for users to slice and dice data and generate reports.

**BENEFIT TO CITY COLLEGES OF CHICAGO:**

Broad-based CCC use of Zogotech's data warehouse and business intelligence software will furnish immediate insight into metrics driving student success. More broadly, CCC employees at all levels will be better able to use data, accessible in Zogotech's reports, as evidence for or against impending decisions, driving CCC further towards establishing a culture of data- driven decision-making and data transparency. Functional reports, such as scorecards, strategy maps and dashboards, will serve as a great decision support, helping CCC pinpoint problems by uncovering data at the relevant District, college, site, departmental, program, course and even student levels.
